## GeoXT 6000 Series Handheld Conversion Special

A special upgrade program has been created, allowing US Federal Government customers to upgrade any existing Trimble® GeoXT™ handheld to the latest GeoExplorer® 6000 series GeoXT, with Trimble Floodlight™ satellite shadow reduction technology for improved field efficiency.

The new 6000 series GeoXT handhelds offer several key new capabilities, including:

- The latest Windows Mobile® 6.5 operating system from Microsoft.
- An integrated 5 megapixel digital camera for high quality image capture and seamless workflows.
- A big, bright new 4.2 inch display for crystal-clear text, photos, and maps—even in direct sunlight.
- Lightning-fast processing power and expandable storage; the new processor has 256 MB of RAM and 2 GB of internal flash storage, with a slot for an SDHC providing up to 32 GB of removable storage space.
- The latest-generation 220 channel GNSS receiver with optional Floodlight satellite shadow reduction technology, combining GLONASS satellite tracking with new GNSS algorithms to achieve unprecedented satellite availability and accuracy in difficult conditions.
- Optional (at time of purchase) integrated cellular modem for live internal or VRS™ connectivity.

Customers can order the new GeoExplorer 6000 series GeoXT handheld with or without integrated cellular modem. In either case, the trade-in value is US\$ 1,250 off the GSA contract price of the relevant GeoXT. This promotion is available until 1 October 2011.

### Ordering information

For this conversion special, order the required GeoXT part and US\$ 1250 credit listed below directly from Trimble, and supply the unique serial number\* of the customer's existing GeoXT handheld.
