

## Safeguard Your Investment with GeoLine's New Premium Protection

Now that you've invested in the equipment and software to maximize the productivity and effectiveness of your crews, we recommend you **protect your investment** with one of GeoLine's **new premium protection programs**.

The objective of these programs is to provide customers with total "peace of mind" and cost predictability by combining premium service and support into a single affordable plan that **maximizes your return on the investment** you've made. These programs include free annual calibration, extended manufacturer warranties, access to GeoLine's support materials archive, free/deeply discounted service loaners, and Trimble Preferred Support.

Benefits include predictability of your annual support and service costs, best-in-class support to keep your crews productive, and added confidence in your equipment knowing it is calibrated and operating as it was designed.
